

## Kalingwe

**Altitude:** 1700 – 2000 m.a.s.l.  
**Processing:** Hand-picked, floated, sun-dried  
**Harvest:** April 2025  
**Variety:** SL14 and SL28 and some older regional landrace varieties.  
**Cup profile:** Full bodied, bold texture, a complex and fruity coffee.

**Kalingwe** is the name of a community high in the foothills of the Rwenzori Mountains in the far west of Uganda. Agri Evolve have been working with groups of farmers in this area for the past 8 years and have developed excellent relationships. The Farmers understand the requirements for fully ripe red ‘cherries’, freshly harvested, and we pay top prices on the day of delivery. It’s a relationship of trust, support and commitment. Within the Kalingwe area there are 5 farmer groups with a total of 150 farmers. In addition to helping the farmers develop their coffee production we are providing energy efficient stoves for members of the groups, and providing tree seedlings for farmers to plant. Local

farmers have increased confidence in the reliability of the structures we have in place, so they can plan to increase production, and thus improve their livelihoods through more successful and profitable farming.

Our Kalingwe from the April 2025 crop has been scored SCA 85.75. Tropical and berry notes dominate. Full bodied and a bold texture, a coffee that is full of life!

### Prices:

For 1 – 4 Bags **£9.40 per Kg**
